December 12, 2006 - Nashville, Tennessee

State of Tennessee signs five (5) year
Contract with the Nashville based Mobile X-Ray Company

X-Ray Services, Inc. (XRSI) announced today that it has signed a five (5) year contract with the state of Tennessee to provide mobile digital imaging to two correctional facilities located in Nashville.

“The two correctional centers covered under this contract, Woodland Hills and New Visions Youth Development Centers, have never utilized this mobile diagnostic technology before” stated Joel Herring, President of X-Ray Services, Inc. a leading provider of mobile digital imaging. Herring continued by saying “when this contract is put into effect on December 15th of this year, the attending physician can request an x-ray or ultrasound be performed on the spot. Up until now, the patient-inmate would have to be transported to a local hospital for tests and diagnosis. This leads to the increased possibility of escape such as what occurred in February 2006.” “Our service assists the correctional facility in limiting the chance of escape as well as adding convenient, high quality and prompt diagnostic tools for the attending physician” added Herring.

XRSI began serving facilities in June of 1999 and continues to be the leader in digital mobile imaging in Tennessee. XRSI’s growth is fueled by acquisition and by utilizing the latest state of the art digital equipment. Our entire company utilizes technology provided by EVOLVED© formerly INPHACT©, also based in Nashville. The digital technology allows facilities and physicians to view their x-ray images instantly by way of RadWeb© an Internet viewing option provided by EVOLVED©. This gives high quality mobile x-ray images as well as the report information availability 24/7 from anywhere in the world.

With this technology, XRSI can provide service anywhere in the South East or the world with the results available to the patient’s personal physician almost immediately. “We continue to be excited about bringing this high quality mobile x-ray service to the area” Herring says.
